

HEAT LANCE

For Distressed Pavement Repair Preparation

Warms and Dries Pavement

CRAFCOTM
AN **ERGONE** COMPANY **INC**

"Pavement Preservation Products"

High Temperature, High Velocity , Flameless Heat Lance

- Remove vegetation
- Warm pavement in cool weather
- Dry pavement moisture from dew
- Velocity of up to 3000 Ft per second

Ball Valve Controls

Mixture Controls for Air and Combustion Mixture

Lightweight

Stainless Steel Combustion Chamber Construction

Wheel Kit Included

Flameless 400°F - 2600°F Output

The Heat Lance is used to dry and prepare pavement cracks, potholes and distressed pavement surfaces for repair. Featuring separate valves which control the mixture of fuel and compressed air at the point of combustion. The Heat Lance is capable of producing heat up to 2,600 degrees with a velocity of 3,000 feet per second. The combustion chamber is constructed from Stainless Steel for lasting durability. All fuel is ignited before exiting the burner tube providing flameless hot air at the point of pavement contact. The Heat Lance comes standard with a wheel kit, a 40ft hose, LP gas regulator, air regulator gauge, water separator, standard Chicago tank fittings, and abrasion wrap with quick connect fittings. Lance weight is approximately 9.2 pounds.

One year warranty against material defects and workmanship.
